INTRODUCTION

This report provides preliminary data on offenders released to parole supervision from facilities of the New York State Department of Correctional Services during calendar year 1984. Only first released are included. For each of eleven characteristics the amount of time served is shown. Time served is broken down into two groups. One includes only the time served in Department of Correctional Services custody. The other group includes jail time in addition to the time served in DOCS custody. The computer file from which these data were obtained will be subjected to an audit process designed to correct inconsistencies and complete any missing data. After this audit has been completed, a final report, Characteristics Of Inmates Discharged - 1984, will be prepared. This report will examine the various characteristics in detail and compare them to findings for previous years.

INTRODUCTION

The Department of Correctional Services (DOCS) released 13,966 offenders from facility custody during calendar year 1985. A major portion (9,901 or 70.9%) were released to parole supervision for the first time since their date of commitment to DOCS. This report presents descriptive data on a variety of attributes describing the characteristics of this group of offenders as well as data on the amount of time served in penal facilities.

The variables covered in this report include: gender; ethnic group; region; age on release; felony class; first/second felony sentence status; prior education; prior occupation; minimum sentence; maximum sentence; commitment offense; and median time served by crime. Charts showing the percent distributions of the variables are presented along with crosstabulations by time served in DOCS custody. Tables showing combined DOCS time plus local jail time are also included for selected variables.

In addition to the material on 1985 first releases a breakdown of the other 1985 release categories is provided. Also, the number of admissions by type and releases by type are shown for each calendar year covering the period 1976-1985.
